## **BUILDING CONSTRUCTION**

## **EXAMINATION SCHEME**

There will be three papers, Papers 1, 2 and 3 all of which must be taken. Papers 1 and 2 shall be a composite paper to be taken at one sitting.

- PAPER 1: will consist of forty multiple-choice objective questions all of which are to be answered in 45 minutes for 40 marks.
- PAPER 2: will consist of five short-structured essay questions. Candidates will be required to answer any four in1 hour for 60 marks.
- PAPER 3: will be a practical test. It will consist of two sections, Sections A and B. The paper will take 2½ hours and will carry 100 marks.
  - Section A: will be for candidates in Nigeria, Sierra Leone and The Gambia only. It will be on BUILDING DRAWING and shall consist of four questions including a compulsory one. Candidates will be required to answer the compulsory question and any two of the other questions.
  - Section B: will be for candidates in Ghana only. It will consist of six essay questions including a compulsory one. Candidates will be required to answer the compulsory question and any three of the other questions.

## DETAILED SYLLABUS

S/NO.	CONTENT	NOTES
1	Introduction to Building	(i) Definition of building
		(ii) Classification and types
		(iii) Introduction to National Building Codes.
		(Building regulations and Byelaw requirements)
2	Building Construction and	(i) Definition, purpose and procedures for
	Construction Team	building construction
		(ii) Parties in the construction team. (Client's
		team, contractor's team and statutory
		personnel.
		(iii) Function of the team members.
		(iv) Relationship of the parties.
3	Safety Practices.	(i) Definition of safety, rules and regulation.
		(ii) Hazards in the workshop and construction

			site.
		(iii)	Causes and method of accident prevention.
		(iv) Safety equipment and measures at	
		construction site.	
		(v)	First aid equipment, procedures and safety
		(*)	wears.
		(vi)	Safety in working with dangerous equipment
		(*')	and materials (electricity, scaffolding,
			formwork, cement, roof, etc).
4	Basic tools, equipment and	(i)	Identification and functions of basic.
	machines	(i) (ii)	Tools and equipment.
		(iii)	Care of tools and equipment.
5	Site clearing and levelling	(i)	Operations involved in site clearing.
Ŭ		(ii)	Tools and equipment for site clearing and
		(")	levelling.
		(iii)	Basic site levelling operations.
6	Site organization and layout	(i)	Preliminary operations in building
		(.)	construction.
		(ii)	Procedure for site layout.
		(iii)	Location, boundary lines, hoarding,
			hutments and access road.
7	Setting out	(i)	Methods of setting-out. (3:4:5 method,
	-		Builders' square method).
		(ii)	Tools and equipment for setting out.
S/NO.	CONTENT		NOTES
		(iii)	Procedures for setting out.
8	Building Drawing	(i)	Use of drawing tools and simple exercise on
			plane geometry in relation to building.
		(ii)	Building drawing symbols
		(iii)	Scales used in building and their application
			on site.
		1 /:. A	Uraduation drawings and interpretations
		(iv)	Production drawings and interpretations
			(Plans, Elevations, sections and details).
		(IV) (V)	(Plans, Elevations, sections and details). Special details (Detailing building elements
		(v)	(Plans, Elevations, sections and details). Special details (Detailing building elements including doors and windows schedule).
			(Plans, Elevations, sections and details). Special details (Detailing building elements including doors and windows schedule). Scaling (Enlargement, pictorial and
		(v) (vi)	(Plans, Elevations, sections and details). Special details (Detailing building elements including doors and windows schedule). Scaling (Enlargement, pictorial and perspectives.
		(v) (vi) (vii)	<ul> <li>(Plans, Elevations, sections and details).</li> <li>Special details (Detailing building elements including doors and windows schedule).</li> <li>Scaling (Enlargement, pictorial and perspectives.</li> <li>Definitions and use of Auto-CADD.</li> </ul>
9	Excavation and earth-work.	(v) (vi)	(Plans, Elevations, sections and details). Special details (Detailing building elements including doors and windows schedule). Scaling (Enlargement, pictorial and perspectives.

		(iii) Methods of excavations.	
		(iv) Tools, equipment and plant used for	
		excavation.	
		(v) Solution to excavation problems (Earthwork	
		support, timbering battering and	
		dewatering).	
		(vi) Safety rules during excavations.	
10	Foundation	(i) Definition, purpose and functional	
		requirement of foundation.	
		(ii) Types of foundation.	
		(iii) Factors that determine choice of	
		foundation.	
11	Ground Floors	(i) Types, functions and functional	
		requirement of ground floor.	
		(ii) Methods of construction ground floor.	
		(iii) Definition of basement.	
		(iv) Explain differences between building with	
		basement and without basement.	
		(v) Problems relating basement in a building.	
12	Suspended floors	(i) Definition and functions of upper floor	
		(ii) Methods of construction concrete floors	
		and timber upper floors.
